

THRILLER, FILLER, & SPILLER MAP FOR ANNUAL PLANTING

Thriller: this is a plant that adds height & drama to the container. Typically this is planted in the middle or back of the container.

Filler: as mentioned by their name, these fill in the middle ground of containers. These plants tend to have a mounded or rounded habit.

Spiller: these plants are ones that gracefully spill over the sides of containers. They can be blooming plants to add color or just leaves for nice texture.
